Mental health within elite sport has traditionally been ignored, but recent research has shown that competitive sport can at times seriously undermine mental health and that athletes are exposed to specific stressors that hinder their mental health optimisation. Mental Health and Well-being Interventions in Sport provides an indispensable guide for researchers and practitioners wanting to understand and implement sport-based intervention processes. This important book adopts an evidenced based approach, discussing the context of the intervention, its design and implementation, and its evaluation and legacy. With cases on depression, eating disorders, and athletic burnout, the book is designed to provide practitioners, policy makers and researchers with a cutting-edge overview of the key issues involved in this burgeoning area, while also including cases on how sport itself has been used as a method to improve mental health. Written for newcomers and established practitioners alike, the text is an essential read for researchers and practitioners in better understanding the sport setting-based intervention processes through presenting current research, theory and practice, applicable in a variety of sports settings and contexts.

The oldest and most respected martial arts title in the industry, this popular monthly magazine addresses the needs of martial artists of all levels by providing them with information about every style of self-defense in the world - including techniques and strategies. In addition, Black Belt produces and markets over 75 martial arts-oriented books and videos including many about the works of Bruce Lee, the best-known martial arts figure in the world. Sports medicine and sports science are relatively new and rapidly developing fields of knowledge. During the past 2 decades, a significant body of scientific knowledge has been published in these areas. However, there is a demand for practical references which address sports medicine and science in the context of different sports. This demand is higher in some sports including combat sports, which are highly physically and mentally demanding, and cause challenging issues such as risk of blood-borne infections, weight reduction, head injuries, stress management, and safety for women and children. This book has been developed to meet the needs of the practitioners who work with combat sports athletes in order to improve their health and performance. Combat sports include four Olympic sports (boxing, wrestling, judo, and t- kwondo) and other popular sports such as karate, kick boxing, and Wushu. These sports are popular in most countries of the world, both at competitive and recreational levels. Combat sports are practiced by people of different ages for a variety of reasons such as to gain fitness and health benefits and to learn self-defense.
This volume embodies the cumulative results of extensive scientific study and applied work by some of the world's leading experts in the theory and methodology of sport training, and sport/exercise psychology. This comprehensive and accessible resource can be used as textbook or a self-help book and is aimed at students, athletes, coaches, sport scientists or indeed any-one looking to enhance their performance, whatever their sport or activity. The psychological concepts may even be useful for those working in business. It covers the key topics in sport psychology, but also addresses current issues such as talent identification, mental toughness, risk taking, stress management, mindfulness, gender issues, sporting injuries and the use of social media. It contains examples from a multitude of sports around the world, and new developing areas such as strength and conditioning, extreme sport and combat sports. Recognising the importance for the reader to fully understand the topic in order to apply this knowledge, the book provides a comprehensive overview of each topic before presenting practical applications as well as recommending online resources. Every chapter focuses around answering key questions integral to each topic within sports psychology, helping the reader to progress in their understanding of the theory and learning how to apply it. Sports used as examples include: Football (soccer), rugby, tennis, cricket, motorsport, swimming, winter sports, weight lifting, martial arts, athletics (track & field), baseball, and American football.

Contemporary sport psychology is a rapidly developing and theoretically rich discipline, and a sophisticated and challenging profession. The Routledge International Handbook of Sport Psychology offers a comprehensive and authoritative guide to
contemporary sport psychology in all its aspects. Written by a team of world-leading researchers and practitioners from five continents, including both established scholars and the best emerging talents, the book traces the contours of the discipline of sport psychology, introducing fundamental theory, discussing key issues in applied practice, and exploring the most important themes, topics and debates across the sport psychology curriculum. Uniquely, the book presents comparative studies of the history and contemporary practice of sport psychology in ten countries, including the US, UK, China, Japan, Brazil, Russia and Israel, helping the reader to understand the cultural and contextual factors that shape international practice in sport psychology. As well as covering in depth the core pillars of sport psychology, from motivation and cognition to group dynamics, the book also includes a full section on cultural sport psychology, a vital but under-explored sub-discipline that is having a profound influence on contemporary theory and practice. With 56 chapters and unparalleled range, depth and currency, the Routledge Handbook of International Sport Psychology is an essential addition to any library with a serious holding in sport psychology.

Written by an international team of expert contributors, this unique global and authoritative survey explores in full but accessible detail the basic constructs and concepts of modern sport and exercise psychology and their practical application. The book consists of 62 chapters, written by 144 contributors, deriving from 24 countries across the world. The chapters are arranged in nine cohesive sections: sport and exercise participants; the influence of environments on sport and exercise; motor skills; performance enhancement; building and leading teams; career, life skills and character development; health and well-being enhancement; clinical issues in sport psychology; and professional development and practice. Each chapter contains chapter summaries and objectives, learning aids, questions, exercises and references for further reading. Its comprehensive scale and global reach make this volume an essential companion for students, instructors and researchers in sport science, sport and exercise psychology, psychology, and physical education. It will also prove invaluable for coaches and health education practitioners.

This well-illustrated book describes the injuries to the hand and wrist that are commonly encountered among participants in combat sports, explaining the mechanisms of injury and offering state of the art guidance on diagnosis and treatment. It covers both injuries characteristic of individual sports, such as kendo, karate, judo, jiu-jitsu, aikido, and mixed martial arts, and pathologies encountered across the full range of combat sports, including boxing, wrestling, and taekwondo. In addition to management, careful attention is paid to rehabilitation following injury and to psychological aspects of recovery from injury. The book is the result of a collaboration with the International Society for Sport Traumatology of the Hand (ISSPORTH) and has been designed to meet the needs of all practitioners who work with combat sports athletes. While especially helpful for surgeons, physicians, therapists, and rehabilitators, it will also be of value to coaches, trainers, and players. The authors are leading international experts in the field who have been involved with international societies and in some cases have personal experience of combat sports at a high level.
